WORK EXPERIENCE

<i>Current</i>	Intern at Makerville Solutions Pvt. LTD
AUGUST 2015 - CURRENT	mkrv.in I helped the team building android app. The project was making physical locations interactive by providing digital information for each location. We used beacons for the same reason. The information for each location will be displayed on user app. Techologies used: Golang, Postgres, Android, Hstore, Git, GitHub Repo : Source is hosted on private repository

OPEN SOURCE CONTRIBUTION

DroidCon PhyWeb	<p>This project consists of an Android app, developed for DroidCon India 2015, held at Bengaluru. It was used to show the use of Eddystone which is an Open Beacon format by Google for broadcasting of data.</p> <p>Technologies: Android, Material Design, Git, GitHub</p> <p>Link to play store app: Droidcon-PhyWeb</p> <p>Repo link : DroidconIn-2015</p> <p>Blog link : DroidconIn2015</p>
-----------------	--

PROJECTS

E-Student Counter	<p>It was a project for our institute to automate the process at the student counter which includes registration of student to institute and all the student related activities.</p> <p>Technologies : Java, MySQL, MongoDB, Java Swing</p> <p>Repo link : E-students-Counter</p>
Text Editor	<p>Simple text editor by using Python.</p> <p>Technologies : Python</p> <p>Repo link : Editor</p>
Green Energy	<p>It is a simple app which will give you the list of smart devices in your house. You will also get analysis like how much that device has contributed to your total electric consumption. You can remotely turn ON or OFF the device.</p> <p>Technologies : Android Intellij</p> <p>Repo link : GreenEnergy</p> <p>Blog : GreenEnergy</p> <p>Video link : YouTube</p>
QRCodeRG	<p>Simple QR code reader and generator.</p> <p>Technologies : Python</p> <p>Repo link : QRCodeRG</p>

EXTRA CURRICULUM

Event coordinator for coding competition "Pradnya" for 'INC 15'.
IEEE member.

HOBBIES

Reading Books - Technical and Non Technical
Cycling
Sports - Badminton
Competitive coding
